# César E. Chávez Elementary 2018-2019

---

Composting education partnership with the City of Eugene  
Waste Management Program

**28 Fourth Graders**

**~450 Students**

**Kindergarten-5th**

**3 work parties, 30+ Volunteers**

**28 Fourth Graders** participated in this year's Green Team, providing compost education to all K-5 classrooms. They also supported cafeteria and classroom composting keeping almost one ton of waste from our landfill.

Over **450 students** actively composted in our school-wide composting program. This year we purchased re-usable utensils and cups to use during lunch. Green Teamers supported the rollout of the new silverware.

**Kindergarten through 5th grade** classes used the garden for Science education. 4th graders studied various decomposers living in our school compost.

**3 work parties** were held at Chávez this year in coordination with volunteers from the Active 20-30 Club, Wayfair, and School Garden Project. **The 30+ volunteers** rebuilt dilapidated garden beds and maintained our perennial science learning garden.

Thank you for  
supporting our outdoor  
and composting  
education programs at  
Chávez!
